

DHRUV ARVIND MISHRA

Frontend Engineer · UI/UX Designer · AI Builder

+91 9860444618 • dhruvm05062004@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience turning complex product ideas into production-ready web applications. Specialises in React.js, Next.js, and TypeScript, with a strong eye for performance, clean UI, and intuitive UX. Has independently shipped 10+ projects spanning AI-powered SaaS platforms, Chrome extensions, gamified simulators, and civic tech tools — integrating APIs from Gemini, Claude, and custom REST backends. Equally comfortable in Figma and VS Code; obsessed with shipping fast and shipping right.

TECHNICAL SKILLS

Frontend: React.js · Next.js 15 · TypeScript · JavaScript · Tailwind CSS · HTML5 · CSS3 · Vite

Backend & Cloud: Node.js · Python · REST APIs · AWS S3 · Firebase · Supabase · MongoDB · MySQL · Vercel · Render · Netlify

AI & ML: Gemini API · Claude API · LangChain · Magenta.js · TensorFlow.js · Multimodal AI · Prompt Engineering

Design: Figma · Wireframing · High-Fidelity Prototyping · Glassmorphism · Motion Design · Design Systems

DevOps & Tooling: Git · GitHub · CI/CD Pipelines · Chrome Extension MV3 · PWA · Web Audio API

Languages: JavaScript · TypeScript · Python · Java · Kotlin · C

Concepts: Component Architecture · State Management · Core Web Vitals · Responsive Design · API Integration · Performance Optimisation

WORK EXPERIENCE

Frontend & UI/UX Intern · Tech Startup

Sep 2025 – Dec 2025

- Owned end-to-end design of critical user flows — from initial wireframes to polished, developer-ready Figma prototypes.
- Conducted iterative usability testing sessions, translating user feedback into measurable interface improvements across multiple product sprints.
- Collaborated directly with engineering teams to ensure pixel-perfect implementation of UI components, reducing design-to-dev handoff friction.
- Applied UI/UX best practices including accessibility standards, responsive layouts, and component-based design thinking throughout the internship.

PROJECTS

Locker AI · React · Node.js · AWS S3 · Gemini API

- Built an AI-powered SaaS platform that extracts text from PDFs and generates structured, digestible summaries in seconds.
- Integrated AWS S3 for scalable file storage and Gemini API for intelligent content processing — reducing manual reading time significantly.
- Designed a clean, conversion-focused UI with a focus on performance and minimal load times.

DOM.fm (NodeRadio) · Chrome Extension MV3 · Magenta.js · TensorFlow.js · Web Audio API

- Architected a Chrome extension that generates infinite AI-composed music streams synced to the visual DNA of any website the user visits.
- Solved critical MV3 CSP and AudioContext autoplay restrictions by designing a creative split sandbox/frame messaging architecture.
- Ran AI music generation (Magenta.js) in a secure iframe sandbox controlled by background service workers via postMessage.

AI Indic Shopping Assistant · Python · Streamlit · Gemini API · Multimodal AI · DuckDuckGo Search

- Developed a multimodal AI shopping assistant natively supporting Hindi, English, and Hinglish queries.

- Implemented live search across Amazon India, Flipkart, and Myntra with direct buy links — no pre-loaded product database required.
- Built image-based search support and auto-retry logic across 4 Gemini model variants for reliability and fallback handling.

CEO Daily · *Next.js 15 · TypeScript · Firebase · Redis · Tailwind CSS*

- Built a gamified mobile-first CEO simulator delivering 3 high-stakes daily business decisions with real-time consequence tracking.
- Engineered a Redis-powered global leaderboard tracking company valuation and decision streaks across all users.
- Designed a full rank progression system — from Liquidator to Visionary CEO — to drive daily engagement and retention.

CivicLens · *React · Node.js · MongoDB · Leaflet Maps · JWT Auth*

- Built a location-aware civic transparency platform surfacing hyper-local government project data using geo-fencing.
- Integrated AI-generated summaries to make dense government scheme information accessible and locally relevant to citizens.
- Implemented secure JWT-based authentication and interactive map layers via Leaflet.js.

HabitForge · *React · Vite · Node.js · Supabase · Claude API*

- Shipped a full-stack habit-tracking platform with HabiTAI — an AI coaching engine powered by the Claude API — delivering contextual, personalised habit feedback.
- Built focus timer, achievement system, and user profile features with real-time Supabase sync.

Orbit · *Electron · React · TypeScript · Playwright*

- Designed and architected an AI-native desktop browser from scratch with six distinct operator modes.
- Used Playwright for in-app browser automation and React/TypeScript for a responsive, modular interface layer.

Cyber Heist · *React · Tailwind CSS · Gamification*

- Transformed theoretical cryptography education into an interactive, hacker-themed platform with practical encryption missions and competitive leaderboards.

Mini Frontend Tools · *JavaScript · React · CSS*

- Shipped 5+ standalone developer micro-tools: Text Diff Checker, CSS Gradient Builder, AI Prompt Writer, Color Palette Generator, and Landing Page Generator — all live on Vercel.

EDUCATION

B.E. Computer Engineering · *Konkan Gyanpeeth College of Engineering* *2022 – Present (6th Semester)*

ACHIEVEMENTS & LEADERSHIP

- Hackathon Competitor: Active participant in national-level hackathons — Quasar 4.0, Dreamflow, and India Innovates 2026.
- Open Source Builder: Maintains 10+ public repositories on GitHub across frontend tools, AI integrations, and full-stack platforms.
- Karate Bronze Medalist: District-level MASKA competition, demonstrating discipline and competitive drive.
- Algorithmic Thinker: Completed 50+ challenges on Codewars, maintaining consistent focus on logic and problem-solving efficiency.
